SUMMARY

A highly motivated junior full-stack JavaScript developer with experience in developing web applications using a range of technologies, including React, Node.js, MongoDB, and MySQL. Adept at working in a team environment, with excellent problem-solving and communication skills. .

EDUCATION

Bachelor of computer science

2020-2021

Rebbotkap-2022

professional certificate in full stack web development

EXPERIENCE

Instructor full stack javascript

8- 01-2023

- Teaching: Deliver lectures, conduct hands-on coding sessions, and provide guidance on best practices in coding, debugging, and problem-solving. Make use of real-world examples and projects to illustrate concepts.
- Code Reviews: Review and provide feedback on students' code and projects. Help them understand where they can improve and maintain code quality.
- Mentoring: Offer one-on-one mentoring and support to students who may be struggling with certain concepts or facing challenges in their coding journey.

PROJECT

Kharja

- As a UI Designer and Developer, I worked on an agile mobile application project for event booking. I used React Native for the frontend and integrated Firebase for backend services. The combination of React Native and Firebase allowed us to deliver a user-friendly and efficient event booking experience. Github-repo:<https://github.com/yassin-bouzgarrrou/Event-Project-5arja>

Food & ymmy

- I played a key role in a team responsible for building a food delivery platform. My responsibilities included implementing authentication, developing user interfaces with React.js, and creating a secure payment page. I collaborated with the design team, utilized modern technologies like Node.js and Express.js, and followed agile methodologies to deliver high-quality solutions.

current project

- "I am currently engaged in a dynamic and innovative project focused on the development of a Car Rental App. In this role, I have taken a leading position in creating a user-friendly mobile application using React Native, designed to provide customers with a seamless and efficient platform for renting cars. My responsibilities encompass UI/UX design, real-time payment processing integration, and location-based services implementation, ensuring an exceptional user experience

SKILLS

Client-Side

HTML CSS JS

React Vue Redux TypeScript

Bootstrap tailwindcs React-native

jquery Typescript

Server-side
